Unit 0 – Crew Exercise

Crew Exercise

- The goals for this exercise include:
 - Know your peers, be known by them
 - Help the professor to know you
- The dynamics of the exercise are:
 - You will divide the class in groups of two students
 - Each group will have 10-15 min to know each other
 - I will reconvene the class
 - Each student will have up to 2 minutes to introduce another to the class
 - A student can only introduce people who are not introducing him or her.
- You can say anything you agreed with your peer, but should have at least the information set described in the next slide

Crew Exercise: Information to be Conveyed

■ Name and basic bio

- Examples of basic bio are location where he/she came from, area that he/she leaves, and other aspects that help creating a person's profile
- Make sure you say only what he/she wants the class to know (privacy concerns)

■ Affiliation, professional background, etc

■ Skills

- Programming skills? What language/application?
- General skills you believe are important to the group project

■ Trivia and personality traits

- Whether he/she sees him/herself as an extrovert or an introvert
- Something funny or peculiar (optional)

■ Aspects that must **not** be conveyed:

- Politics, religion, views on ethical issues, and other controversial subjects
